<Contents> Special Lectures for Overseas Fieldwork in Vietnam

<Lecturer> Dr.Trinh Tien Dat

<Title> Common diseases in Vietnam, Vaccination in Vietnam

“Joint Annual Health Review 2015”

“Management model in Tu Du Hospital”

“Health Care System in Vietnam“

- We invited the vice director of Tu Du hospital. He talked about the infection, management system in TuDu hospital, common disease and health insurance in Vietnam. He provided information of social background, the current health system, and its problems in Vietnam. Dengue fever is one of the major infection disease in Vietnam. He presented a case report of pregnant women hospitalized with dengue infection at Tu Du Hospital in 2015. He also presented recent efforts to improve public health in Vietnam, resulting in a great reduction of infant mortality rate.
